TO WHOM IT MAY CONCERN:

This is to certify that

Zhejiang Wanfeng Chemical Co., Ltd.

Xin'er Village, Mar'an Town, Shaoxing, Zhejiang, 312073, China

is a bluesign® system partner.

bluesign® system partners are responsibly acting parties of the textile supply chain that are committed to applying the bluesign® system. As such, they are required to meet a high level of safety for both people and the environment, to use resources responsibly, and to continuously improve their environmental performance.

Chemical products carrying the bluesign® approved label meet the strict ecological and toxicological requirements of the bluesign® criteria.

System partner as well as certified chemical products are registered in the bluesign® bluefinder.

Sustainability is part of their philosophy and they are dedicated to acting on their responsibility.

List of Certified Products

In 2016, Wanfeng carried out strategic cooperation with blue standard and became a partner of blue standard, taking another major step on the road of sustainable development of textile chemicals. Wanfeng fully recognizes the five principles of blue standard and actively practices them in its own management system. Over the years, Wanfeng has taken creating value for customers as its own responsibility, developed new technologies, new products and new processes leading the healthy development of the industry with the concept of ecological environmental protection, energy conservation and high efficiency, and made long-term unremitting efforts for the sustainable development of the global textile supply chain. With the promotion of blue label certification, Wanfeng will further actively explore the transformation of the textile printing and dyeing industry from terminal control to source control, and work with the upstream and downstream of the industrial chain to build a sustainable, healthy and responsible green textile supply chain!

At present, some of Wanfeng's products have passed the blue standard audit and landed in bluesign® bluefinder. More products will be added in the future.
